

Foo#(a,42)

```
graph TD; A[\"Foo#(a,42)\"] --> B[a]; A --> C[42];
```

The diagram illustrates the structure of the expression 'Foo#(a,42)'. It is represented as a tree where the root node is 'Foo#(a,42)' (yellow), which branches into two child nodes: 'a' (green) and '42' (purple).
